# Career Suitability Assessment

Saying "good job" is not bad, however, it may not be accomplishing the goals you have in mind.

Job quality based on the weighted average of satisfaction on all 10 dimensions on a scale of 1 to 5. Scores below 3 on the combined index indicated a bad job; scores between 3 and 4 signified a mediocre job; and a score of 4 or 5 indicated a good job.

Every Job has its own significance. Every job is equivalently important to another role. Each of us are contributing to all our lives somewhere or the other in every role that we perform. Job roles are interdependent when it comes to responsibility and contribution.

Think of an Electricity Board employee who work for all of us. Think of a Health Department employee who works for all of us. Think of a Bank Employee who works for all of us. Which one do you think is the best job? And Which one do you think is the worst job?

It is always important to contribute your best to the role that your assigned to you to perform the best Job. Interest will be disturbed when you don't focus in the role. Focus and develop your skills to the best to perform well in the job and set your career.
